

Checking your print size:

Confirm Printed Paper Size

1. Prior to printing, ensure that page scaling is set to “none” on your print dialog box.
2. Measure the bar below to ensure it is exactly two inches long. (5cm)
3. If measurement is not accurate, check that you are printing the page at full size and reprint before continuing.

Method one – measure finger with paper sizer

1. Carefully cut along the outline of the sizer as well as the small slit at the left end of the sizer
2. Wrap the sizer around the intended finger* with the letters facing out.
3. Slide the pointed end of the sizer through the slit.
4. Move the sizer to the largest part of the finger, this may be the knuckle.
5. Pull tightly. The sizer must fit snugly to produce an accurate size.
6. The letter that lines up at the slit represents the ring size for that finger

Note: Avoid measuring cold fingers. Wait until the end of the day when they are at their largest.

Method two

1. Select a ring that properly fits the intended finger.*
2. Place the ring over the circles below, matching the inside size of the ring to the circle nearest in size.
3. If the ring falls between two sizes, order the half size.

*The 'ring finger' is located between the little finger and middle finger.
Engagement and wedding rings are traditionally worn on the ring finger on the left hand.
